Periods of record: San Diego temperature: 1872, precipitation: 1850. Santa Ana temperature: 1916, precipitation: 1906. Riverside: 1924. Escondido: 1900. Big Bear Lake: 1960. Idyllwild: 1943. Palomar Mountain: 1938. Victorville: 1917. Palm Springs temperature: 1917, precipitation: 1906. Borrego Springs temperature: 1965, precipitation: 1942.

On this day in...

1980: It was 116° in Palm Springs and 113° in Borrego Springs, each the highest temperature on record for October. This also occurred in Borrego Springs the next day on 10.3.

1858: A category one hurricane hit San Diego, the only documented hurricane to strike California in history. This occurred before official weather observations began. Implied winds of at least 75 mph were based on damage and journalistic accounts. Extensive wind damage to property neared F2 (Fujita Scale) damage. Streets were swept clean by heavy rains.
